Community Cluster.....3

Landscape Class.....B

Description

There are very few counties in group, but these counties could experience infrequent but extreme fire. These counties could include preparedness as a primary focus of their fire strategy.

Example of a Typical County

Roscommon County, Michigan: Counties to the north and west have experienced large fire on the Huron National Forest, but this county burned less often historically.

Challenges and Opportunities

Vegetation and Fuels

Local discretion should be used to determine the importance of fuel treatment, which treatment is applicable and what is affordable based on the use of local resources.

Homes, Communities and Values at Risk

Individual homeowners can be proactive on home defensive actions.

Human-Caused Ignitions

Human caused ignitions are not as great here as in other parts of the country, but may deserve attention if a local situation dictates.

Effective and Efficient Wildfire Response

Response organizations continue to protect structures, treat fuels and target ignitions as local conditions apply.

National Priorities

Vegetation and Fuels	Very Low
Homes, Communities and Values at Risk	Low
Human-Caused Ignitions	Low

Effective and Efficient Response:
There is high risk of large wildfires, less potential for resource benefits.
