

7D

Community Cluster.....7

Landscape Class.....D

Description

These fourteen more urban, agricultural counties of the Central Plains and Interior West have relatively high socio-economic advantage and a low area burned.

Challenges and Opportunities

Vegetation and Fuels

Local discretion should be used to determine the importance of fuel treatment, which treatment is applicable and what is affordable based on the use of local resources.

Homes, Communities and Values at Risk

Individual homeowners can be proactive on home defensive actions. These counties could adjust building and construction codes in non-municipal areas.

Human-Caused Ignitions

Human caused ignitions are a problem in these counties. Reduce accidental and human-caused ignitions through enforcement or outreach.

Effective and Efficient Wildfire Response

Response organizations continue to protect structures, treat fuels and target ignitions as local conditions apply.

Example of a Typical County

Cass County, North Dakota: Agricultural Cass County, North Dakota includes the town of Fargo.

National Priorities

Vegetation and Fuels	Very Low
Homes, Communities and Values at Risk	Low
Human-Caused Ignitions	Moderate

Effective and Efficient Response:
There is moderate risk of large wildfires, less potential for resource benefits.
